

Positioning and mounting of Mill WiFi wall heater

IMPORTANT: It is essential that the wall heater is attached to the wall using the correct screws and plugs.

1. Some products are heavy and your safety is dependent on the construction/ strength of the wall to which the heater is attached. Check before use and seek professional advice as relevant.
2. Wall screw fixings have been supplied with this item but we recommend you select appropriate fixings according to the type and strength of wall and weight of item to be hung. We recommend seeking professional advice before selecting screw fixings.
3. Never hang onto a damp wall or in damp conditions

MOUNTING INSTRUCTIONS

We strongly recommend that this product is installed by persons competent in DIY and that you use a reputable professional to mount large / heavy items.
